PROFILE

Software Engineer with 4+ years of professional experience building production grade, high performance SaaS applications using React, JavaScript (ES6+), and TypeScript. Skilled in scalable application development, performance optimization, and cross functional collaboration. Strong advocate for clean, maintainable code and core engineering principles (SOLID, DRY, KISS). Experienced working in fully remote and on site teams with designers, backend engineers, and product managers.

TECHNICAL SKILLS

Frontend: React, Next.js, JavaScript (ES6+), TypeScript, TanStack Query, Axios, Redux, Zustand
Styling: Tailwind CSS, ShadCN UI, Material UI, Mantine, Bootstrap, Responsive Design, WCAG Accessibility
Testing & Quality: Jest, Unit Testing, Integration Testing, TDD, ESLint, Prettier, Stylelint, Code Reviews
Performance: Component memoization, render optimization, bundle size reduction, performance profiling
Backend & APIs: Node.js, Ruby on Rails, RESTful APIs, tRPC, Supabase, Drizzle ORM, SQL, NoSQL
Tooling: Git, GitHub, CI/CD, Vercel, Netlify, Figma

EXPERIENCE

Flolyt — *Founding Frontend Engineer* Dec 2025 – Present

- Leading end-to-end frontend development of an AI-powered customer engagement platform built with React (Vite) and TypeScript.
- Built core product modules including Dashboard, Customer Intelligence, Segmentation, Campaign Workflows, Analytics, and Settings.
- Designed and implemented an AI-powered Workflow Studio enabling users to generate campaigns and automate workflows via natural language prompts.
- Integrated REST APIs using Axios, implemented authentication flows, state management, and robust error handling for production-ready data interactions.
- Collaborated closely with Product Managers, Backend Engineers, and Designers to deliver a scalable, accessible, cross-device MVP.

Codetratives — *Full Stack Engineer* Dec 2024 – Dec 2025

- Delivered client projects across diverse industries in collaboration with Engineering Managers, Product Managers, and cross-functional teams.
- Developed responsive UI components using Tailwind CSS and ShadCN UI, improving page load time by 20%.
- Enhanced platform accessibility features, optimized application performance, and resolved production bugs across multiple projects.
- Conducted code reviews, pair programming sessions, and mentorship to maintain code quality and drive team knowledge-sharing.

Self-Employed — *Full Stack Engineer (Independent Contractor)* May 2023 – Dec 2024

- Designed and developed custom software solutions from architecture planning to deployment for multiple clients across industries.
- Optimized dashboard rendering by 30% through proper state management and elimination of unnecessary component re-renders.
- Led end-to-end project management including requirements gathering, development, testing, and client communication.
- Integrated new technologies and tools to improve development efficiency, scalability, and maintainability.

Teckciphers — *Software Engineer* May 2018 – Sep 2022

- Partnered with Engineering and Product teams to ship new features and platform enhancements that improved user experience and system reliability.
- Delivered accessibility improvements and UI refactors that improved WCAG compliance and reduced support tickets.

EDUCATION & CERTIFICATIONS

B.sc, Computer Engineering Lagos State School of Technology, 2020 – 2023

Certifications: Full-Stack Web Development Specialization – Coursera (2023) • JavaScript Algorithms and Data Structures – Coursera (2022) • React Frontend Development – Coursera (2022)
